## Projects

### Spotify Clone (Jan 2025)

Developed a web-based Spotify clone using HTML5, CSS, and JavaScript, featuring music playback, playlists, and a responsive UI. Built with 1000+ lines of code, and seamless audio controls for an engaging user experience.

#### Key contributions:

- Designed a modern UI with 500+ lines of CSS, ensuring a visually appealing and responsive layout.
- Implemented 10+ interactive elements (e.g., song titles, progress bar) that update in real time based on user interactions.
- Structured the 1000+ lines of code for easy integration of new features.
- Used JavaScript DOM manipulation to render song details (title, artist, album art) in real time, updating 3+ elements dynamically with each song change.

### Personal Portfolio (Aug 2025)

Developed actionable insights based on comprehensive feedback analysis aimed at addressing the three most significant pain points related to navigation errors reported by users during initial trials.

#### Key contributions:

- 5+ Featured navigation highlighted on the main banner.
- Implemented HTML5 & CSS & Java Script
- 3+ Screen Sizes Supported: Designed for desktop, tablet, and mobile using responsive CSS.
- 3+ Screen Reader Support for better content description
